Meeting Minutes

Date of Meeting: July 14, 2015

Project Name/No:

Our Island Home

Facility Improvements SMRT Project No. 15126

Location of Meeting: Our Island Home

Subject:

Programming Requirements

Meeting

Attendees: Rachel K. Chretien - Administrator

Gail Ellis, RN., - Director of Nurses

Ellen Belknap - SMRT Dick Webb, SMRT Melissa Flynn, SMRT

Discussion Items:

The primary purpose of the meeting was to review the project scope and discuss the program requirements for the new/replacement facility.

- 1. The proposed program is to reflect the evolution/shift from institutional to residential style model; eliminating the shared rooms and long corridors. RC confirmed that the formal 'Greenhouse' model is not required, but does want to adhere to the small house tenets.
- 2. RC confirmed that all staff excepting the administrator are unionized, Town employees. While there has been some cross-training between housekeeping and CNA's, there may be some concern by staff to shift to the universal worker/care giver model. Typically, RN's administer medications, treatments, and care plans. CNA's roles focus on hands on care, including bathing.
- 3. The proposed bed count is to total 45. Existing census includes acute rehabilitation, dementia, and long term care. Approximately 45-50% of the existing patients present some level of dementia. Approximately 2/3 of the population is female. Room size in the 300-350SF range is desired, including European baths.
- 4. All rooms will be incorporated to support ceiling mounted transfer/lift apparatus.
- 5. Central kitchen is desired. Family style kitchens are needed not only for the care model but to assist in the rehabilitation training and for family activities.
- 6. Staff offices may be shared; however, areas for private conversation are needed.
- 7. Desired model size is three (15) bed modules, which will support existing staffing plans [one charge nurse/module].
- 8. Specific areas to be included in the facility include spa, gym, salt water aquarium, and hair salon area. Three activity areas are to be provided; largest one to accommodate 8-10 residents and two staff, and also include storage for activity supplies and seasonal decorations. Other Activities Department needs include a larger living room [twice the existing size].

- 9. Storage for vaccines and specimen storage/blood draws are desired, including possible 'treatment' room.
- 10. Storage requirements are significant, as the facility must store a substantial amount of equipment in the case of isolation/disaster preparation/loss of contact with the mainland.
- 11. Staff parking minimum spaces required. 10 visitor spaces required. Existing Landmark House parking overlaps on OIH parking areas.
- 12. OIH requires spaces for two transport vehicles; including covered area. OIH intends to replace one van with an ambulette. Parking for one service pickup truck is also required.
- 13. Open air, secured/enclosed garden area is desired.
- 14. Storage of med gasses is required.
- 15. RC prepared a staffing summary/teaming organization for review when updating the proposed facility program. Additional offices are required.
- 16. SMRT staff will be on island 7/21 to assess the existing facility conditions, including architectural, mechanical, and electrical engineers. OIH staff will be available to provide access.
- 17. Next Meeting: July 28, 2015

PROJECT: Our Island Home 45 Bed Elder Care Facility, Nantucket

PROJECT NO: 15126-00

CAPACITY: 45 Resident

SPACE PROGRAM

	Designated Space Staff	Unit	Unit Area Net SF	Total Area Net SF	Comments
Typical	Ноте				
1.01	Private Resident Room	15	285	4,275	All private rooms
